

Assisted-Living home for girls

Location: Nísia Floresta (Grande Natal) – RN

Goal: With care-giver assistance, a home for up to 6 girls, 18 and over who need to be re-integrated back into society

The assisted-living program arose due to the need to fully shelter and assist young people who turn 18 in the orphanages and who, upon reaching adulthood, cannot legally remain in these places.

It emerged as a natural sequence of care and investment to help young people, because many lived for long periods of time in orphanages or maybe even because some of them have cognitive limitations and when they turn 18 they are unable to live on their own.
